

Track views/faves/comments on a DeviantArt gallery.

Analytics

Medium Setup

WHAT YOU'LL NEED

- A DeviantArt login cookie
- The DA username to track

STEP BY STEP

1

Log into DeviantArt

Sign in at deviantart.com in a desktop browser. The username comes first, then **Next** asks for the password.

 Continue with Facebook

Become a Deviant [Join DeviantArt](#)

By logging in, I accept DeviantArt's [Terms of Service](#), and I acknowledge reading the [Privacy Policy](#).

2 Copy your login cookie

To read a cookie: log in on a desktop browser, press **F12** to open DevTools, go to **Application** (Chrome/Edge) or **Storage** (Firefox) → **Cookies** → the site, then copy the **Value** of each named cookie. DeviantArt's login is the **auth** cookie (with **auth_secure** and **userinfo** beside it).

Name	D...	P...	Ex...	Size	H...	S...	S...	P...	Cr..
_px	.d...	/	2...	377		✓	Lax		
_pxvid	.d...	/	2...	42		✓	Lax		
auth	.d...	/	2...	111	✓		Lax		
auth_sec...	.d...	/	2...	118	✓	✓	Lax		
aws-waf...	.w...	/	2...	339		✓	Lax		
g_state	w...	/	2...	147					
pxcts	.d...	/	S...	242		✓	Lax		
td	.d...	/	S...	23			Lax		
userinfo	.d...	/	2...	282			Lax		

DeviantArt with DevTools open on Application → Cookies, the auth, auth_secure and userinfo rows named, their values blurred here

3 Connect in PawPoller

Paste the cookie and the target DA username in Settings.

WHERE IT GOES IN PAWPOLLER

Settings → DeviantArt → Cookie + Target user

KEEPING IT ALIVE

The cookie expires periodically — stats stop updating. Log back into DeviantArt and paste a fresh cookie.

GOOD TO KNOW

- On the server DA polls through the CF proxy (datacenter IPs are blocked).
- DeviantArt now has an official OAuth API that returns public stats without a cookie — a future PawPoller update will switch to it and drop the cookie step.
