WHAT YOU'LL NEED

- A Toyhouse account with at least one character

STEP BY STEP

1. **Easiest: press Sign in**
   In the PawPoller desktop app, press **Sign in** beside Toyhouse and sign in in the window that opens. On a server or seat, press **Sign in with the PawPoller app** and follow the code on screen. Then you can skip the rest of these steps.

2. **Add Toyhouse**
   On the **Accounts** page, add a Toyhouse account and type your Toyhouse username.

3. **Sign in**
   Press **Sign in**. Toyhouse's own sign-in page opens. Sign in there and the window closes by itself.

4. **No Sign in button? Sign in on the website**
   Sign in at toyhou.se in your own browser. toyhou.se ↗

5. **Open the developer tools**
   On the Toyhouse page, press **F12** (on a Mac: **Cmd + Option + I**). A panel opens beside or under the page.

6. **Chrome or Edge: open the cookie list**
   Click the **Application** tab (it may be behind »), then **Cookies** on the left, then the Toyhouse address under it. A table of names and values appears.

7. **Firefox: open the cookie list**
   Click the **Storage** tab, then **Cookies** on the left, then the Toyhouse address under it. A table of names and values appears.

8. **Copy the values**
   Find the cookie named `laravel_session` in the **Name** column. Double-click each one's **Value** and copy it. Treat them like a password: anyone holding them is signed in as you.

9 **Paste it in PawPoller**

On the **Accounts** page, press 🔑 **Sign in** on the Toyhouse account and paste the `laravel_session` value into the `th_cookie` box, then save.

10 **Pick characters when you post**

When you post a piece, tick Toyhouse, open its **Override**, and tick the characters the image belongs to.

WHERE IT GOES IN PAWPOLLER

Accounts → Toyhouse → Sign in (or the laravel_session cookie)

KEEPING IT ALIVE

When Toyhouse signs you out. Press Sign in on the Accounts page again, or paste a fresh laravel_session cookie.

GOOD TO KNOW

- Toyhouse shows no view counts, so PawPoller tracks favourites and comments.
- Content flags are filled in from the piece's rating and tags: Adult is marked Explicit, Mature is marked Mild. Mature or Adult work tagged as showing someone underage is refused, as Toyhouse's rules require.
- No "Posted via PawPoller" line is added on Toyhouse.
