Analytics + Posting | Easy Setup

Open this guide as a PDF ↗

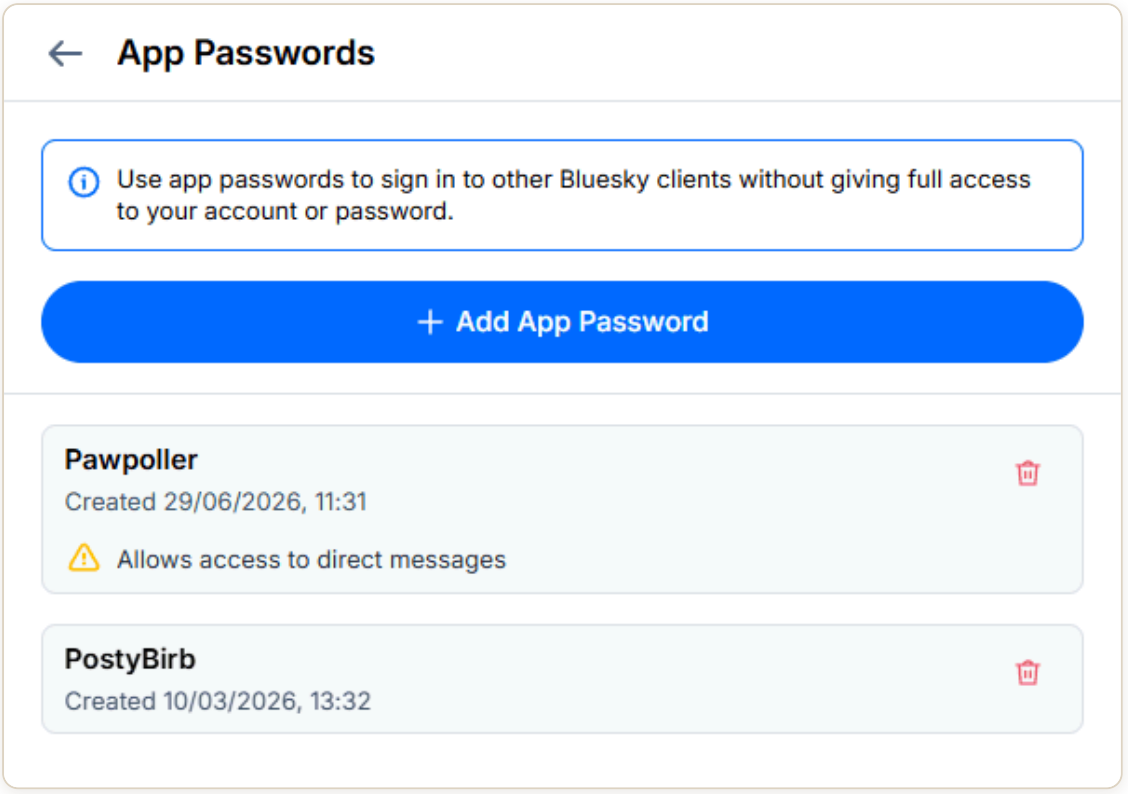

WHAT YOU'LL NEED

- A Bluesky account
- An app password (not your main password)

STEP BY STEP

1 Open App Passwords

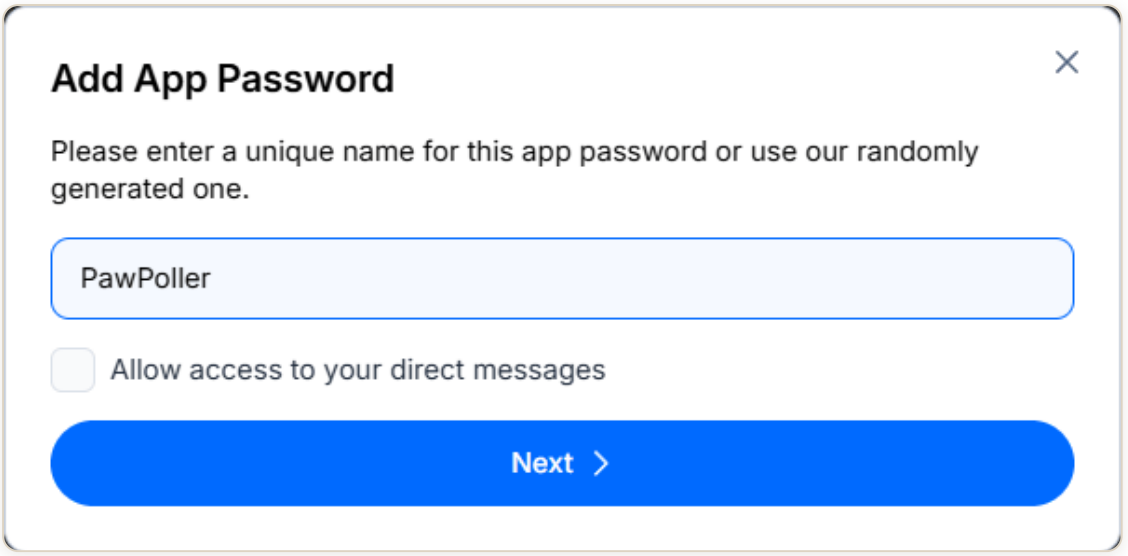

In the Bluesky app or web: **Settings** → **Privacy and Security** → **App Passwords**. Bluesky app passwords ↗

Bluesky's App Passwords page with the Add App Password button and the existing passwords listed

2 Create one

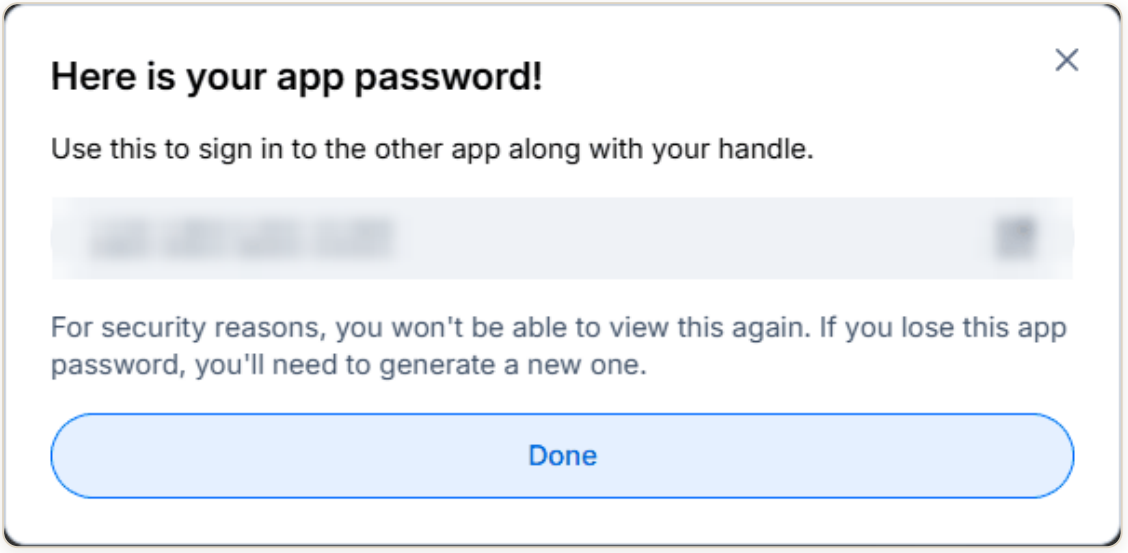

Press **Add App Password**, name it "PawPoller" and press **Next**. Leave direct-message access unticked — PawPoller never reads your messages.

The Add App Password dialog with the name PawPoller typed in and the direct-messages box unticked

3 Copy it straight away

Bluesky shows the password once (it looks like `xxxx-xxxx-xxxx-xxxx`). Copy it before pressing **Done** — after that it can only be deleted and made again.

Here is your app password: the one-time password (blurred here) with a copy button and Done

4 Connect in PawPoller

Enter your handle (e.g. `you.bsky.social`) and the app password in Settings.

WHERE IT GOES IN PAWPOLLER

Settings → Bluesky → Handle + App password

KEEPING IT ALIVE

App passwords don't expire — only if you revoke one. Create a new app password and paste it in.

GOOD TO KNOW

- Always use an **app password**, never your real password — you can revoke it anytime.
- Posting works from any IP. Images are auto-downscaled to fit Bluesky's blob limit.
