PAWPOLLER · GETTING STARTED GUIDE

Inkbunny

Track your Inkbunny submission stats using your login.

Analytics + Posting | Easy Setup

Open this guide as a PDF ↗

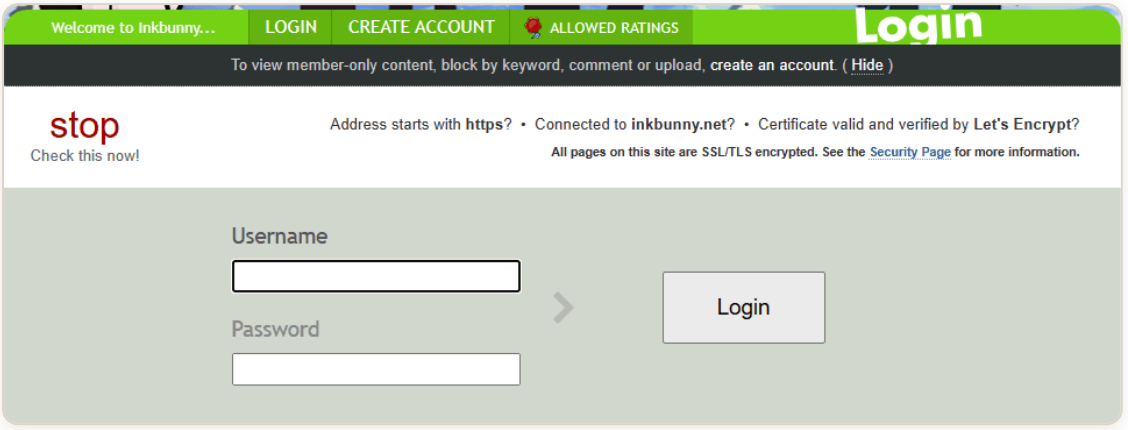

WHAT YOU'LL NEED

- An Inkbunny account
- API access enabled on that account

STEP BY STEP

1 Log into Inkbunny

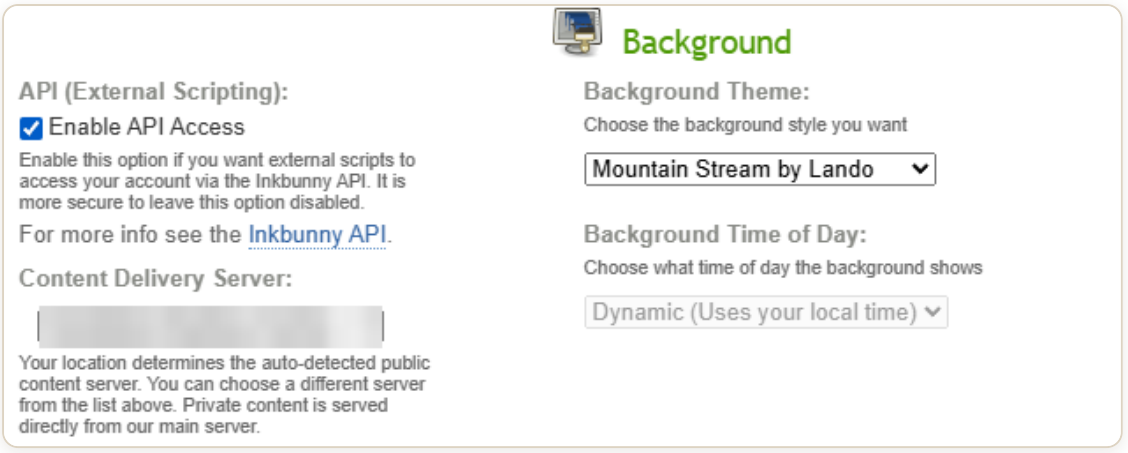

Sign in at inkbunny.net. inkbunny.net ↗

Inkbunny's Login page: Username, Password, Login

2 Enable API access

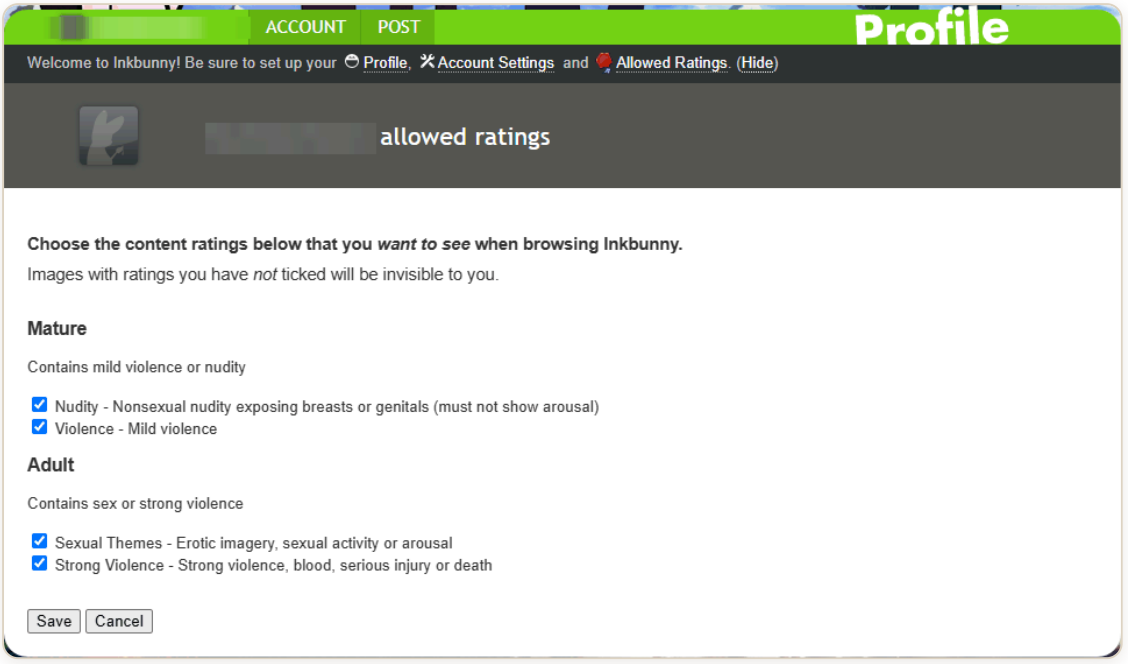

Go to **Account** → **Settings** and turn on **Allow API Access** (accept the API terms). The API uses your normal username + password to log in.

Account Settings, the API (External Scripting) box with Enable API Access ticked

3 Allow the ratings you post

If you post mature/adult work, set your content-rating preferences so the API can see it.

The allowed ratings page with the Mature and Adult boxes ticked

4 Connect in PawPoller

Enter your Inkbunny username and password in Settings.

WHERE IT GOES IN PAWPOLLER

Settings → Inkbunny → Username + Password

KEEPING IT ALIVE

Only if you change your Inkbunny password. Re-enter the new password in Settings.

GOOD TO KNOW

- Nothing expires on a schedule — it stays connected until you change your password or revoke API access.
