PAWPOLLER · GETTING STARTED GUIDE

Picarto

Watch your Picarto channel grow: lifetime views, followers, subscribers, when you were last live, and your recorded streams.

Analytics | Easy Setup

WHAT YOU'LL NEED

- Your Picarto channel name — nothing else (no password, no login)

STEP BY STEP

1. **Find your channel name**
   Open your channel on Picarto. Your channel name is the last part of the address in your browser: in `picarto.tv/YourName` it is **YourName**. picarto.tv ↗

2. **Paste it into PawPoller**
   Go to **Settings** → **Platforms** → **Picarto** and type or paste the name into **Channel name**.

3. **Click Save**
   PawPoller checks with Picarto that the channel exists. You will see **Saved — found the channel …** with the name spelled the way Picarto spells it, or a message saying no channel by that name was found.

4. **Click Poll now**
   Click **Picarto Poll Now**. After a few seconds your numbers appear on the **Picarto** dashboard.

WHERE IT GOES IN PAWPOLLER

Settings → Platforms → Picarto → Channel name, then Save

KEEPING IT ALIVE

Nothing expires. If you rename your channel on Picarto, type the new name into Settings and click **Save** again.

GOOD TO KNOW

- The dashboard shows your lifetime channel views, followers and subscribers, a chart of how they change over time, and whether you are live now or when you were last live.
- Recorded streams only appear if **recording** is turned on for your channel — it is a Picarto premium feature. Without it, the recordings list stays empty, and that is normal.
- Picarto does not count views on individual recordings, so PawPoller does not show a view number for them.

- Adult (18+) channels work exactly the same.
