PAWPOLLER · GETTING STARTED GUIDE

Rule34.xxx

Follow score and comments on your Rule34 uploads, and (with Track) posts other people upload with your artist tag or your characters. PawPoller never posts to Rule34.

Analytics Only | Easy Setup

Open this guide as a PDF ↗

WHAT YOU'LL NEED

- A Rule34.xxx account
- Your API key and user id (Rule34 now asks for both, even to read)

STEP BY STEP

1 Find your API key

Log in to Rule34.xxx and open **My Account** → **Options**. Under **API Access Credentials** you will see an API key and a user id (a number). Copy both. rule34.xxx ↗

2 Connect in PawPoller

In Settings → Platforms → Rule34.xxx, enter your Rule34 **username**, paste the **API key** and the **user id**, then press **Connect**.

3 Choose what to follow

In Settings → Accounts, press **Track** on the Rule34 account to add your artist tag and your characters. Posts by other people land under **Found on Rule34**, apart from your own uploads.

WHERE IT GOES IN PAWPOLLER

Settings → Platforms → Rule34.xxx → Username + API key + user id

KEEPING IT ALIVE

API keys don't expire. Only if you make a new key on Rule34 — paste it back in.

GOOD TO KNOW

- Rule34 shares a **score** and a **comment count** for each post. It does not share views or favourites, so those stay blank rather than reading as zero.
- Posting to Rule34 is done by hand on the site; PawPoller only reads it.
