PAWPOLLER · GETTING STARTED GUIDE

SoundCloud

Track your tracks' plays, likes and comments, and publish audio pieces as tracks.

Analytics + Posting | Involved Setup

WHAT YOU'LL NEED

- A SoundCloud account with an **Artist Pro** subscription
- API access granted through SoundCloud's request form
- The app's client id and secret

STEP BY STEP

1. **Request API access**
   SoundCloud only hands out API access on request. Fill in the developer request form; approval is case by case and can take weeks. SoundCloud API request ↗

2. **Register the redirect URI**
   Once approved, open the app's settings on SoundCloud and add the redirect URI PawPoller shows after Connect. SoundCloud only redirects back to an address registered on the app.

3. **Paste the credentials**
   Copy the app's **client id** and **client secret** into Settings.

4. **Approve PawPoller**
   Click **Connect & authorise**; SoundCloud opens in your browser, you approve once, and polling starts.

WHERE IT GOES IN PAWPOLLER

Settings → Platforms → SoundCloud → Client id + Client secret, then Connect & authorise

KEEPING IT ALIVE

Tokens refresh themselves. If polling stops, click **Re-authorise** on the SoundCloud card and approve again.

GOOD TO KNOW

- SoundCloud does **not** allow adult audio: an adult-rated piece is refused before anything is sent; a mature one goes through.
- The poster image becomes the track's cover.
