PAWPOLLER · GETTING STARTED GUIDE

YouTube

Track your channel's views, likes, comments and subscribers, and upload video pieces with the poster as the thumbnail.

Analytics + Posting | Involved Setup

WHAT YOU'LL NEED

- A Google account with a YouTube channel
- Your own Google Cloud project

STEP BY STEP

1. **Make a Google Cloud project**
   In Google Cloud, create a project and enable the **YouTube Data API v3**. Google Cloud console ↗

2. **Configure the consent screen**
   Set up the OAuth consent screen and add yourself as a **test user**.

3. **Create the OAuth client**
   Make a **Web application** OAuth client. After Connect, PawPoller shows the redirect URI to add as an authorised redirect URI on that client.

4. **Paste and authorise**
   Copy the client id and secret into Settings, click **Connect & authorise**, and approve PawPoller in your browser.

WHERE IT GOES IN PAWPOLLER

Settings → Platforms → YouTube → Client id + Client secret, then Connect & authorise

KEEPING IT ALIVE

Every 7 days while the consent screen is in Testing. Click **Re-authorise** on the YouTube card. Publishing the consent screen stops the weekly expiry.

GOOD TO KNOW

- Uploads from a project that has not passed YouTube's **API compliance audit** stay **private** whatever you ask for. PawPoller uploads, sets the thumbnail, tells you what YouTube set, and you flip each one public in Studio.
- YouTube does not allow sexually explicit content: an adult-rated piece is refused before anything is sent.
